

**Type of Manuscript** (empirical research, case study, literature review, etc)

Received: DD.MM.YY

Accepted: DD.MM.YY

---

**Here Add the Title Not Exceeding Twelve Words** (Do not modify the format. In case that your study was presented as an article, thesis, project or oral/poster presentation, please add this information as a footnote.)

**Name Surname<sup>1</sup>, Name Surname<sup>2</sup>,**

---

#### **Abstract**

The abstract should be written with Times New Roman font, 10 font size, and justified. It should be arranged under the following headings: Purpose, Method, Results, and Conclusion.

The abstract should not exceed 300 words for the manuscripts written in English. The extended Turkish summary should be between 400 and 2000 words. **The Journal offers translation services for those not fluent in Turkish.**

**Keywords:** They must include (at least) five to (at most) seven words. The keywords must be separated with a comma and written in lower case letters.

#### **Turkish Title**

#### **Extended Summary**

The extended Turkish summary should be written with Times New Roman font, 10 font size, and justified. It should be arranged under the following headings: Purpose, Method, Results, and Conclusion.

As of **26.03.2025**, the number of words required in the Turkish and English extended abstract for new articles submitted to our journal has been revised. (See the link: <https://dergipark.org.tr/en/pub/dkyad/page/18306>)

- For articles whose main text is in **Turkish**, the extended English abstract should contain **at least 40%** of the Turkish text in terms of word count. In the extended abstract in English, mainly information related to the Methods and Results sections should be presented. Figures and/or tables in the main text should not be included in the extended English abstract. Finally, the extended abstract should include in-text references, and the references should match with the bibliography.

<sup>1</sup> Corresponding Author, Title, Institution (The name of the department will also be written if the institution is a University), e-mail address, ORCID NO.

<sup>2</sup> Title, Institution (The name of the department should also be written if the institution is a University), e-mail address, ORCID NO, (Authors should provide this information in a separate page.)

be included in the extended Turkish abstract. Finally, the extended abstract should include in-text references and the references should match with the bibliography.

**Keywords:** must include (at least) five to (at most) seven words. The keywords must be separated with a comma and written in lower case letters.

**IMPORTANT: Please upload your manuscript in word (.doc or .docx) format to the DergiPark system so that the referees can take notes on the manuscript and your manuscript can enter the double-blind refereeing process.**

### **Introduction**

Do not modify the format in the following sections. All the succeeding sections should be written with Times New Roman font, 12 font size and double-spaced. The first line of each new paragraph should be indented by one tab space, which should be set to 1.25 cm. The length of the manuscript should not exceed 10000 words including references.

**The first level heading should be written with the initial letters in capital, bold and left-aligned.**

*The second level heading should be written with the initial letters in capital, bold, italic, and left-aligned.*

*The third level heading should be written with the initial letters in capital, italic and left-aligned.*

In research articles, the manuscript should include introduction, method, results, and discussion sections, in that order.

### **Method**

#### **The Method/Model/Design of the Study**

The method/model/design used in the study should be explained and justified in detail under this heading.

#### **Participants**

The information regarding the variables including age, gender, socio-economic status related to the participants should be given under this heading. In the manuscript, Tables should be referred to with expressions such as “as shown in Table 1”. The Tables should follow.

<Table 1> (See the examples given in the final page)

### **Data Collection Tools**

The intended purposes of the data collection tools used in the study should be explained under this heading which should include their psychometric features.

### **Data Analysis/Implementation**

The information regarding data collection techniques, methods of analysis, and implementation should be provided under this heading.

## **Results**

In accordance with the purposes of the study, the results of the study (either supporting the hypotheses or not) should be given under this heading.

<Table 2> (See the examples given in the final page.)

The statements should be appropriate to the analyses while reporting the statistical findings. For instance, the t and F tests should be reported along with the degrees of freedom. The figure numbers and titles should be written with Times New Roman font, 10 font size and left-aligned. In the manuscript, a statement referring to the figure such as “as shown in Figure 1” should be made, followed by the figure.

<Figure 1> (See the examples given in the final page.)

## **Discussion**

The results should be discussed and explained with reference to relevant literature under this section.

Please see the Author Guidelines of the Journal of Speech, Language, and Swallowing Research (DKYAD) for further and detailed information regarding the sections mentioned above.

## **References**

Few examples are provided below. Please see the “Publication Manual of American Psychological Association” (APA) (7th ed.) for further information on how to report the references in text and otherwise. ## **Appendix**

### **Appendix-1: The text given to the participants**

Coronavirus variants exclusive to Turkey are in circulation, but it is not clear how they will affect the patients, a Turkish expert has said as mutated strains of the coronavirus force countries around the globe to take additional measures. “There are about 400 people in the country who are infected with the new virus variants, including variants specific to Turkey,” Professor Hasan Tezer, a member of the Health Ministry’s Coronavirus Scientific Advisory Board, said in an interview to local media. “We have South Africa, United Kingdom variants. We have variants exclusive to our country as well, but it is not clear yet how those will affect the outbreak,” he said.
